

## Index

Brunswik, E. (1956). *Perception and the representative design of psychological experiments* (2nd ed.). Berkeley, CA: University of California Press.

The original index was prepared by Carolyn Hursch in about 1964, but some pages were lost and never found. In 1998, the missing pages were redone by Vivian Schneider at the University of Colorado, with the encouragement and guidance of Ken Hammond.

a-variables 17

Absolute

distances 63, 64

magnitude (of the constant error) 63

size 6

Abstract processes 22

Academic

psychology 41

tradition of social perception of emotions 41

Accumulation of factors, successive 24-25

(or fractional) 27

Accuracy of perception 19

Achievement 30, 32, 34-35, 46, 48, 57, 67, 84, 93, 110, 140-143

distal 61, 100, 109

perceptual 34, 35, 45, 50

Acquisition of perceptual cues 123-131

Active

arrangement 11

command of variables 12

control of variables 7-8

Actualgenesis 133

Actuality, perceptual 145

Acuity, visual 24

*ad hoc* 124

Adaptation level, 73

Adjacent area variable 15, 19

Adjustiveness, biological vii

Adjustment 23, 71, 142, 143

cognitive 93

After the fact elimination 10

Aggregates of conditions 36-37

Agreement among judges 30, 35, 112-113

Aim,

distal 61, 59-146

proximal 71

Albedo 21, 38, 123, 124, 125

Allport, G. W. 42, 103, 111, 147

Ames, A 69, 143, 147
